II In this chapter you will see what all things change languages but that's the point, they happen to be like that. We're not responsible for them. It's on the language and we don't want to change that. Just around you see a language and don't think it's too much. You are not supposed to. I'd. Nevertheless you can read them, just pretend you don't and don't read as they are parts about them. Leave them to, I'd.
